About Me

As a dedicated full-stack development student with hands-on experience in front-end development and graphic design, I bring a unique blend of technical expertise and creative problem-solving. With a strong foundation in building dynamic web applications and designing engaging user interfaces, I'm passionate about crafting solutions that enhance user experiences and drive innovation.

My background also includes valuable experience as a cashier, where I developed exceptional customer service skills and a keen attention to detail. This role has strengthened my ability to manage multiple tasks efficiently, communicate effectively, and provide excellent service, all of which complement my technical capabilities.

I am skilled in HTML, CSS, JavaScript, and various front-end frameworks, and I have experience with graphic design tools such as Adobe Creative Suite. My goal is to leverage these skills in roles that challenge me to create impactful solutions and continue growing as a developer. I'm open to opportunities in web development, UI/UX design, and any position where I can contribute to innovative projects while furthering my knowledge in the tech industry.
